sky

Peppermint

Yellow
sunflower

**+ 1 Activator
8,5 Volume**

Delicate hydrogen peroxide cream
combined with Lisaplex™ Pastel Color
for a safe, smooth and beautifully
conditioned application.

TECHNICAL RECOMMENDATIONS

1. To obtain the ideal application base it is necessary to decolour or lighten the hair. In the case of decolouration, mix 30 g of bleaching powder with its activator then add in 5 ml of Lisaplex™ Bond Saver and apply.

2. Once the decolourant is processed, rinse with luke-warm water and wash with TOP CARE® REPAIR COLOR CARE Post-colour Acid Shampoo and then continue by applying TOP CARE® REPAIR COLOR CARE pH Balancing Conditioner.

3. Dry the hair and then apply Lisaplex™ Pastel Color.

NB: There is no need to add Lisaplex™ Bond Saver to the Lisaplex™ Pastel Color as it is already within the formula.

FAQ - frequent answer question

1. Can I apply Lisaplex™ Pastel Color to a hair colour level higher than a 10?

Yes, you can.

2. Are the results the same if apply to a hair colour with a level of below 9?

Without pre-lightening the results will not be so pronounced.

3. Does Lisaplex™ Pastel Color fade sooner when applied to a hair colour with a level of over 10?

Yes, the colour fades more quickly.

4. How long does Lisaplex™ Pastel Color last on average?

Four to six shampoos. The duration also varies according to hair type and structure.

5. Can I mix the shades of Lisaplex™ Pastel Color together?

Yes, you can inter-mix the shades of Lisaplex™ Pastel Color. It is advisable to test your results when creating personalised effects.

6. Does Lisaplex™ Pastel Color cover white hair?

Lisaplex™ Pastel Color is not designed to cover white hair but it can obviously be used to deposit colour.

7. Can I apply Lisaplex™ Pastel Color to wet hair?

It is advisable to use it on dry hair for a better result.

8. Can I use a hydrogen peroxide of a different volume?

Using Lisaplex™ Pastel Color Activator 8.5 vol. is the recommended and ideal way to create best results.

9. Is it necessary to use a specific decolourant for Lisaplex™ Pastel Color, for example one with an ammonia-free formula?

No, it is not necessary. However it is vital that the decolourant used gives you the lift required to achieve your results. We recommend using either Bleach&Light Pro Tech or Neutrol Bleach.

Lisaplex™ Pastel Color Peppermint: if applied to a warm base shade of 9 or 10 may give a green / blue result. The colour results vary depending on the type and colour of the hair to which it is applied.

SWEDEN#16

Pink Bubble
Light Pearl
Yellow Sunflower

PREPARATION

After decolouring the hair with Lisaplex™ Bond Saver 5 ml + 30 ml of Bleach&Light Pro Tech Decolourant + 45 ml of Developer (blend 1+1.5).

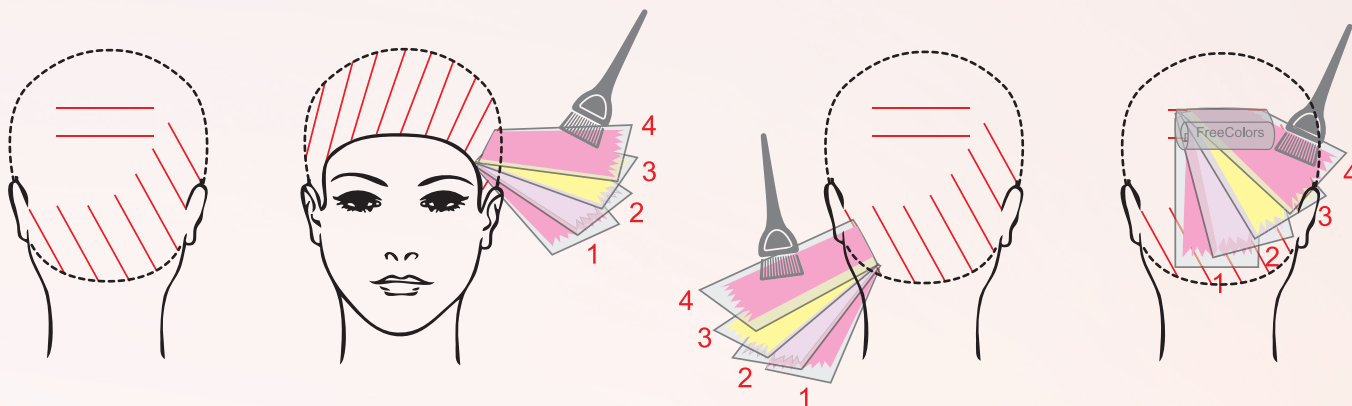

Apply Absolute Spray onto damp hair to balance the porosity of the hair. Dry the hair with a hairdryer.

CONTRA SECTIONING

Use Freecolors with a contrary application method: apply **Freecolors** against the direction of the final style. (E.g.: if the hair is directed and combed to the right, start from the left temple for the application of the **Freecolors**.)

The starting point is parallel to the sideburn. The thickness of the sections for these effects is moderately fine but is always open to artistic expression.

The **Freecolors** were applied diagonally to the entire circumference of the head. The final **Freecolors** will be beyond the occipital/nape area. Apply **Freecolors** to the central area and continue to the centre of the head.

COLOUR BLENDS

In three bowls prepare:

- 20 g di Pink Bubble + 40 ml Lisaplex™ Pastel Color Activator
- 20 g di Yellow Sunflower + 40 ml Lisaplex™ Pastel Color Activator
- 20 g di Light Pearl + 40 ml Lisaplex™ Pastel Color Activator

The number of **Freecolors** varies according to the thickness of the sections and the volume of the hair.
The shades can be chosen according to the desired colour.

PROCESSING TIME

20 minutes from the application of the last **Freecolors**.

Once the processing time is over, rinse the **Freecolors** one by one with lukewarm water using Top Care® Repair Color Care Post-colour Acid Shampoo and then immediately apply Top Care® Repair Color Care pH Balancing Conditioner to neutralise oxidative residues and stabilise the colour.

FINISHING

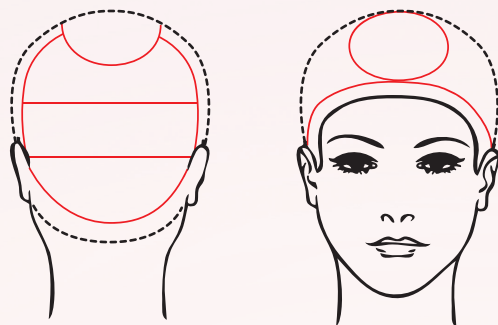

Use Sculture Creator Water Wax for a really shiny final effect or Sculture Sleek Spray to emphasise the details of the hairstyle.

RAINBOW

Pink Bubble
Light Pearl
Blue Sky
Peppermint
Lilla Flower

PREPARATION

After decolouring the hair with Lisaplex™ Bond Saver 5 ml + 30 ml of Bleach & Lights Pro-tech Decolourant. Apply Absolute Spray onto damp hair to balance the porosity of the hair. Dry the hair with a hairdryer.

TAKING SECTIONS

- Perimeter-nape area: Isolate 2 cm right along the perimeter of the head. This will be the first part to be coloured;
- Perimeter forehead/sideburns area: Isolate 2 cm from the base for the entire length of the perimeter that goes from ear to ear. This will be the final part to be coloured;
- Oval area: starting from the middle of the right eyebrow, create an oval that goes to the left eyebrow;
- 1st section: create a rectangular section in the rear area;
- 2nd-3rd section: Use similar sections as far as the nape.

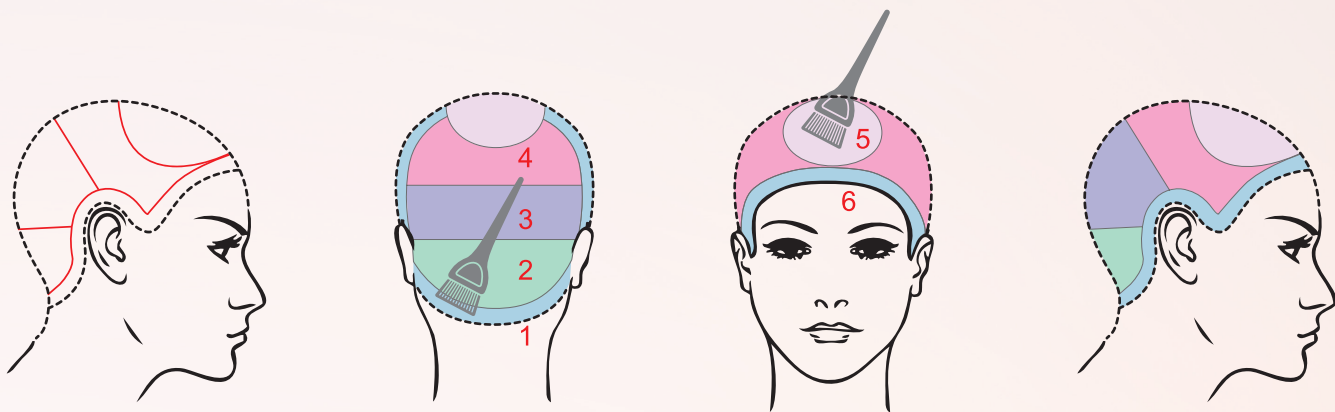

COLOUR BLENDS

1st bowl: 25 g Colouring cream* + 50 ml Lisaplex™ Pastel Color Activator 8.5 volume.

*Colouring cream in the following shades: Peppermint, Lilac Flower and Pink Bubble.

2nd bowl: 10 g Blue Sky + 20 g Cloudy Cream + 60 ml Lisaplex™ Pastel Color Activator 8.5 volume for perimeter-nape area and perimeter forehead/sideburns area.

3rd bowl: 15 g Light Pearl + 30 ml Lisaplex™ Pastel Color Activator 8.5 volume for oval area.

APPLICATION

- Perimeter-nape area: apply Blue Sky + Cloudy Cream
- 1st section: evenly apply Peppermint;
- 2nd section: evenly apply Lilla Flower;
- 3rd section: evenly apply Pink Bubble;
- Oval area: evenly apply Light Pearl;
- Perimeter forehead/sideburns area: apply Blue Sky + Cloudy Cream

PROCESSING TIME

After applying colour to the final area of the perimeter forehead/sideburns area, leave for 10 minutes. Once the processing time is over, quickly rinse with lukewarm water then apply Top Care® Repair Color Care Post-colour Acid Shampoo and then immediately apply Top Care® Repair Color Care pH Balancing Conditioner to neutralise oxidative residues and stabilise the colour.

FINISH

Apply Sculture Sleek Spray.
